### University web portal changes and improvements

During the period of the implementation of the Re@WBC project the newly elected leadership of the University of Novi Sad (from October 2015) initiated the refreshment of the university website in Serbian and English, with new content and design.

The main objective was to be more open, transparent, attractive and internationally oriented, in terms of incoming and outgoing students, staff mobility as well as educational and scientific international projects.

The new web site is created both in Serbian and English using modern technology. It is more informative in comparison to the previous one. It aims to making domestic and foreign prospective students and staff more aware of the educational, research and professional development opportunities offered by and for the University of Novi Sad, as well as facilitating academic mobility in the Republic of Serbia in general. It has been reinforced with the main objective to offer all the necessary information for domestic and foreign students, researchers and staff.
