6.1	Organizing and	10.12.2015.	11.12.2015.	University	The kick-off meeting was organized as a two-	Management bodies made
6.1.	realizing a Kick-off			of Nis	day event. The objectives of the kick-off	Procedures for project

and coordination	meeting were:	management approved
meetings	 to introduce the partners to each other to develop a common understanding of the project objectives, activities and expected results to discuss in detail the action plan for the first six months to clarify project management and administrative procedures. The first day of the kick-off meeting was divided into three sessions: Part I - Opening session Part II - Introducing project management, monitoring, reporting, financial reporting and technical details Part III - Short presentations by all partner institutions with a special emphasis on their HE research potential and practices, as well as their role in the Re@WBC 	
	On the second day, the partner institutions discussed the contractual, technical and practical aspects of the Re@WBC project implementation. The second day agenda included: • Forming of management structures Presentations of WP • Action plan for the first six months • Presentations of WP Thirty seven representatives from 13 partner	

		1		
			institutions and a representative of the	
			National Erasmus Office were present at the	
			meeting	
01.12.2016.	02.12.2016.	University	The first meeting of the Steering Committee of	Project Management Guide was
		of Belgrade	the Re@WBC project was organized at the	adopted
		_	University of Belgrade, on 01st and 02nd	-
			December 2016. The total number of participants	Project Management Board
			from 11 partner institutions was 25.	was established
			After an introductory session, the working	
			session of the meeting started with a presentation	Dissemination plan was adopted
			of the overall progress of the project activities	
			during the first year of the project	
			implementation as well of those that are yet to be	
			realized in the forthcoming period.	
			The main project deliverables produced in this	
			period were presented by the corresponding	
			work package and task leaders. Since the	
			preparation for the application for the HRS4R	
			logo was the main activity in the first year of the	
			project, we began with a presentation on the	
			progress within this activity.	
			It was pointed out that 5 out of 8 WB partner universities had applied for the HRS4R logo,	
			which is a huge success given that, at the time	
			the project was starting, many of the partners had	
			not even endorsed the "European Charter for	
			Researchers" and "The Code of Conduct for the	
			Recruitment of Researchers". We received	
			information that the University of Tirana,	
			University of Montenegro and University of	
			Belgrade had not managed to apply for the	
			HRS4R logo, and that the University of Tirana	
			had prepared all the necessary documents but it	
			was only for technical reasons that they had not	
			applied for it on time.	

The project coordinator also asked the partners to consider the adoption of the Project Management Guide created in March 2016 to which they had previously been introduced. No objections were raised and the consortium adopted this document unanimously. Following a recommendation of the project officer Mrs Belen Encisco, a new project management body, called the Project Management Board, was established. Each of the partner universities delegated one member of this body with the exception of the University of Nis who delegated two of them. Also, the Dissemination plan was adopted with the agreement that all the partners help with completing the Dissemination Events table given at the end of this document by planning concrete dissemination activities. Also, we talked about the reorganization of the website that was to be done at the suggestion of the project officer Mrs Belen and about the project dissemination. From the very beginning of the project there had been inefficient communication between the management of University of Montenegro and the contact person there Prof. dr Marija Krivokapic's. Therefore, at Prof. dr Marija Krivokapic's own proposal, it was decided that another contact person should be appointed, that the new contact person should come from the university management, and that Marija Krivokapic should keep on working as part of the project. The meeting was concluded with positive impressions and it was everyone's opinion that it was very beneficial and that

				detailed and precise instructions were given for	
				the forthcoming activities, as well as that many	
				questions were clarified that had previously	
				appeared in the	
				course of the project implementation so far.	
	23.03.2017	25.03.2017.	University	On March 23 and 24, 2017, the Re@WBC	
			of	partners met at the University of Montenegro, to	
			Montenegro	discuss the activities and the results achieved in	
				the previous year.	
				The meeting was opened by the vice rector for	
				international relations of the University of	
				Montenegro, Prof. Maja Bacovic. After that,	
				except for the colleagues from the Coventry	
				University who were not able to be present, all	
				the partners discussed their performance, good	
				and weak sides through detailed reports. This	
				activity took a whole working day and was	
				followed by a lively discussion during which the	
				general opinion was that the remaining partner	
				universities would most surely be able to	
				successfully prepare for the application for the	
				HRS4R logo and apply for it before the next	
				deadline for applications, in view of the desire and efforts they had demonstrated in the course	
				of the previous.	
				of the previous.	
				The second working day was devoted to our	
				dissemination activities. The project was not	
				very lively in this part so far, because we had	
				mostly been focused on meeting the above	
				mentioned demands. Yet, it was general opinion	
				that, now that some particular goals had been	
				achieved, we were ready to start a more active	
	l	l	l	actioned, we were ready to start a more active	

6.2.	Developing and adopting procedures for project	01.12.2015	December, 2016	dissemination process. Apart from the project's webpage - with which everybody was satisfied very much - the websites of the partner universities and a variety of info days, we workshopped possibilities of other dissemination venues that range from very formal to very informal. We also spent some time thinking about how to present the project results so that they become more meaningful and useful to our end users. However, since our primary target are researchers, we were of the opinion that many of our activities - like trainings - had two points to them: 1. they were to educate the target, but also 2. they functioned as dissemination for understanding, support, and action purposes. At the project kick-off meeting, held at UNI, the coordinator presented the project activities and ideas to the Consortium representatives so that every detail was clear and transparent to all the participants. Relevant internal documents were adopted. The project management bodies responsible for the complete management of the project realization were set up (SC, WP lead organisations, QAC,) Partnership agreements between the project coordinator	Project Management Guide was created and adopted – see http://rewbc.ni.ac.rs/wp-content/uploads/2016/12/Project-management-guide-for-Re@WBC-project-1.pdf
6.2.	adopting procedures			Relevant internal documents were adopted. The project management bodies responsible for the complete management of the project realization were set up (SC, WP lead	

				guide-for-Re@WBC-project-1.pdf	
		15.11.2015	15.05.2016	Based on the EACEA recommendation UNI developed a draft of the PA and sent it to all the partners for approval. Only the University of Sarajevo and the University of Belgrade recommended some minor changes. After that the final version was adopted and signed by all the partners.	PAs were signed. The Steering Committee, the Quality Assurance committee and the Project Management Board were formed. Workpackage and activity leaders were nominated.
6.3.	Setting-up project management bodies and signing partnership agreements			The following project management bodies were formed: the Steering Committee, the Quality Assurance committee and the Project Management Board.	
				For each workpackage and for each activity within it, a leader was nominated by the consortium charged with the task of collecting and giving all the relevant information.	
6.4.	Establishing a software platform for efficient project management	15.11.2015	01.12.2015	Within this activity a software platform for efficient project management was established in the second month of the project realization and has since been used by all the partners.	The project management platform was established.
6.5.	Coordinating project activities on a daily basis	15.10.2015	Ongoing	There is a satisfactory continual everyday communication and information flow between all the partners.	Adequate documents and information were uploaded to the project platform.
6.6.	Performing financial			Beside the project management guide, in which	The project management guide

management and	all the rules concerning financial management was adopted.	
management and bookkeeping	are listed, the project coordinator prepared a Power Point presentation with the purpose of informing the consortium members on the use of the grant, which has then been distributed to all the partners and also presented at each training/meeting organized during the first year of the project. Also, as for certain financial issues that were somewhat unclear to the partners, the project coordinator contacted the	and
	project officer Mrs Encisco from whom appropriate clarification was received and further forwarded to all the partners, thus settling the matter.	

Activities to be carried out to achieve this outcome (before the end of the project)
